PROFESSIONAL SUMMARY

Senior Full-Stack Software Developer with 6+ years of experience engineering scalable web applications, SaaS platforms, and enterprise solutions. Proven expertise in designing event-driven architectures and distributed systems using modern JavaScript, Python, and cloud-native infrastructure. Adept at driving product development from conceptualization to deployment across multiple domains including QA automation, telecommunications, and healthcare.

TECHNICAL SKILLS

- **Frontend Technologies:** Angular, React, Next.js, HTML, CSS
- **Backend Technologies:** Node.js, Express.js, Nest.js, FastAPI, Core Java, Python
- **Databases & ORMs:** PostgreSQL, MongoDB, GraphQL, Supabase, Prisma, Sequelize
- **Cloud & DevOps:** AWS, Vercel, Firebase, Coolify, Docker, Jenkins, Git, CI/CD
- **Architecture & Tools:** Kafka, RabbitMQ, Redis, LangChain, OpenTelemetry, OpenSearchDB, Geo-Server, Stripe API, SendGrid, Twilio, Swagger, Jest

PROFESSIONAL EXPERIENCE

Gnapi Technologies Pvt. Ltd. | Senior Software Engineer | July, 2025 – Present

PROJECT: QA Automation Framework:

- Architected a centralized QA automation platform utilizing Nest.js and React. Engineered automated bug tracking and Jira ticketing workflows to streamline test case and test plan management.
- Integrated Kafka and Redis for high-throughput event processing and implemented comprehensive system observability and log monitoring using OpenTelemetry and OpenSearchDB.

PROJECT: Electrical Instrumentation System (IQGeo):

- Designed and deployed an asset management system for IQGeo to manage and maintain electrical infrastructure. Leveraged FastAPI, React, and Geo-Server for complex spatial data mapping, utilizing MongoDB for flexible data storage and AWS/Jenkins for deployment.

Xotiv Technologies Pvt. Ltd. | Full Stack Developer | Dec, 2023 – Jun, 2025

PROJECT: AI Sports Edu-Tech App (DEVEBOL):

- Engineered a sports club management platform utilizing Next.js, Prisma, and Supabase. Integrated AI capabilities via LangChain and Redis, and implemented real-time communications using Firebase push notifications, Twilio, and SendGrid.

PROJECT: Healthcare App (ReadMyRhythm):

- Developed a secure telemedicine application for institutional EKG reviews. Built the backend with Next.js and Supabase, ensuring compliant data handling through Truevault and seamless payment processing via Stripe.

PROJECT: PropTech SaaS (AFFCO):

- Built a comprehensive property and tenant management system for a real estate agency using Next.js and Prisma. Integrated Stripe for automated rent processing and SendGrid/Twilio for user notifications.

PROJECT: Golf Course Management System:

- Delivered an in-house enterprise product for golf organizations using Angular and Node.js/Express.js. Designed scalable data models with Sequelize and implemented efficient data fetching using GraphQL.

Tata Consultancy Services (TCS) | Software Analyst | Nov, 2020 – Nov, 2023

PROJECT: Incentive Management System (FIAT Automobile):

- Developed an enterprise sales management platform enabling dynamic configuration of sales strategies and incentives using Java, Spring Boot, and Angular. Managed deployment pipelines using Git, Jenkins, and AWS.

PROJECT: Optical Fiber Management System (Comcast):

- Built a network traffic and maintenance application for Comcast. Engineered the full-stack solution utilizing Angular, Express.js, and MongoDB, ensuring high availability and reliable data querying for critical telecom infrastructure.

EDUCATION

Bachelor of Technology (B.Tech) in Electrical Engineering | 2016 – 2020

Academy of Technology (WBUT) – **CGPA:** 8.1

Higher Secondary (12th Board) | 2016

Hooghly Collegiate School (WBCHSE) – **Score:** 80%

Secondary (10th Board) | 2014

Hooghly Collegiate School (WBBSE) -- **Score:** 88%
